

AI-Powered Job Recruitment & Candidate Management System

Project Overview

The AI-Powered Job Recruitment & Candidate Management System (AIRCMS) is a Salesforce-based recruitment platform designed to streamline and intelligently manage the end-to-end hiring lifecycle — from candidate application and screening to offer approval and onboarding.

The system centralizes candidate records, job openings, interview processes, recruiter activities, hiring approvals, and AI-driven evaluation insights into a single intelligent workspace.

Built using Salesforce Admin capabilities, Flows, Approval Processes, Lightning Experience, and Agentforce AI, the application eliminates manual resume screening and inconsistent hiring decisions by introducing intelligent candidate scoring and automated workflows.

Recruiters can instantly view AI-generated summaries, candidate priority indicators, and hiring recommendations directly on candidate records. Hiring managers can review salary approvals, risk insights, and interview performance summaries through structured dashboards and automated alerts.

This solution enhances recruitment efficiency, ensures standardized decision-making, improves candidate quality, and enforces governance using role-based security and approval processes. The system is scalable, secure, and designed to support high-volume recruitment operations while maintaining data integrity and transparency.

Objectives

Centralized Recruitment Management

Provide a single Salesforce platform to manage:

- Candidate profiles
- Job openings
- Applications
- Interview stages
- Offer approvals
- AI hiring recommendations

Automation of Recruitment Workflows

Streamline:

- Candidate screening
- Interview scheduling
- Offer approval workflows

- Recruiter follow-up reminders
- Status updates

AI-Driven Hiring Intelligence

Enable:

- AI candidate scoring
- Hiring risk analysis
- Candidate summaries
- Recommendation support

Security & Governance

Ensure:

- Controlled access to hiring data
- Approval enforcement
- Role-based record visibility

Phase 1: Requirement Analysis and Planning

1. Understanding Business Requirements

Modern organizations receive hundreds of candidate applications daily. Most hiring teams rely on spreadsheets, emails, and disconnected tools, which leads to:

- Duplicate candidate records
- Lost applications
- Delayed interviews
- Inconsistent hiring decisions
- Lack of transparency
- Poor tracking of recruitment metrics

The business requires a centralized CRM-based hiring system that can:

- Track all candidates in one place
- Standardize screening
- Automate hiring workflows
- Provide AI-driven evaluation
- Improve recruiter productivity
- Support managerial approvals

Salesforce is selected because it offers:

- Secure cloud infrastructure
- Built-in automation tools
- AI capabilities through Agentforce
- Scalable architecture
- Real-time reporting

2. Defining Project Scope and Objectives

Project Scope

The project includes building a Salesforce recruitment system using Admin tools and Agentforce AI without custom Apex development.

The application supports the full recruitment lifecycle:

Candidate → Screening → Interview → Offer → Hiring

Objectives

- Implement Salesforce CRM fundamentals in hiring
- Create a scalable recruitment data model
- Apply security at all levels
- Automate workflows using Flows
- Use AI for candidate evaluation
- Enable approval-driven hiring decisions

Phase 2: Salesforce Development – Backend & Configuration

This phase covers the step-by-step, milestone-wise configuration of the Salesforce org — from account creation through Agentforce AI setup.

Milestone 1: Salesforce Account

Introduction: Salesforce is a customer success platform designed to help you sell, service, market, analyze, and connect with customers. This milestone sets up the Developer Edition org used to build the recruitment system.

Activity 1: Creating Developer Account

Objective: Create a free Salesforce Developer org.

1. Go to <https://developer.salesforce.com/signup>
2. Enter First Name & Last Name
3. Enter Email
4. Enter Job Title: Developer
5. Enter Company: College Name
6. Enter Country: India
7. Click Sign Me Up

Activity 2: Account Activation

Objective: Activate the newly created developer org.

1. Open the inbox of the email used to sign up (activation may take 10–30 minutes, occasionally up to 2 hours)
2. Click Verify Account
3. Set a password and a security question, then click Change Password
4. You will be redirected to the Salesforce Setup page

Milestone 2: Objects Creation

The recruitment system requires custom objects to represent hiring data.

The screenshot shows the Salesforce Setup interface in a web browser. The browser's address bar displays the URL: `creative-impala-32mwfq-dev-ed.trailblaze.my.salesforce-setup.com/lightning/setup/ObjectManager/new`. The page title is "New Custom Object". A yellow banner at the top states: "Permissions for this object are disabled for all profiles by default. You can enable object permissions in permission sets or by editing custom profiles. [Tell me more!](#) [Don't show this message again](#)". Below this, the "Custom Object Definition Edit" section is visible, with buttons for "Save", "Save & New", and "Cancel". The "Custom Object Information" section includes fields for "Label" (with an example of "Account"), "Plural Label" (with an example of "Accounts"), "Object Name" (with an example of "Account"), and a "Description" field. A checkbox for "Starts with vowel sound" is also present. The bottom of the screen shows a Windows taskbar with various application icons and a system clock indicating 20:17 on 12-07-2026.

Activity 1: Creating Job Opening Object

1. From the Setup page, click Object Manager
2. Click Create → Custom Object
3. Enter Label name as Job Opening
4. Enter Plural Label name as Job Openings
5. Enter Record Name as Job Title
6. Select Data Type: Text
7. Select Allow Reports
8. Select Allow Search
9. Enable Track Field History
10. Click Save and New

Activity 2: Creating Candidate Application Object

1. From the Setup page, click Object Manager
2. Click Create → Custom Object
3. Enter Label name as Candidate Application
4. Enter Plural Label name as Candidate Applications
5. Enter Record Name as Application ID
6. Select Data Type: Auto Number — CA-{0000}, Starting with 1
7. Select Allow Reports
8. Select Allow Search
9. Enable Track Field History
10. Click Save

Milestone 3: Tabs

Activity 1: Creating a Tab for Job Opening Object

1. Go to Setup → type Tabs in Quick Find bar
2. Click Tabs
3. Click New (under Custom Object Tab)
4. Select Object: Job Opening, then select a tab style
5. Click Next → keep default profile settings → Next
6. Uncheck Include Tab under Add to Custom App
7. Ensure Append tab to the user's existing personal customizations is checked
8. Click Save

Activity 2: Creating a Tab for Candidate Application Object

1. Go to Setup → type Tabs in Quick Find bar
2. Click Tabs
3. Click New (under Custom Object Tab)
4. Select Object: Candidate Application, then select a tab style
5. Click Next → keep default profile settings → Next
6. Uncheck Include Tab under Add to Custom App
7. Ensure Append tab to the user's existing personal customizations is checked
8. Click Save

Milestone 4: Fields & Relationships

The table below lists all custom fields required across the Contact, Job Opening, and Candidate Application objects.

Object	Field Name	Data Type	Required
Contact	Candidate ID	Auto Number: C-{0000}, Starting 1	Yes
Contact	Experience Level	Picklist (Fresher, Mid-Level, Senior)	Yes
Job Opening	Department	Picklist (IT, HR, Finance, Sales)	Yes
Job Opening	Salary Range	Currency	Yes
Job Opening	Vacancies	Number	Yes
Job Opening	Job Status	Picklist (Open, Closed, On Hold)	No
Candidate Application	Candidate	Master-Detail (Contact)	Yes
Candidate Application	Job Opening	Master-Detail (Job Opening)	Yes
Candidate Application	Application Date	Date	Yes
Candidate Application	AI Candidate Score	Number	Yes
Candidate Application	Offer Amount	Currency	Yes
Candidate Application	Application Status	Picklist (Screening, Interview, Offer Submitted, Approved, Rejected, Hired)	Yes
Candidate Application	Approval Status	Picklist (Pending, Approved, Rejected)	Yes

Activity 1: Creating Picklist Field for Contact Object

1. Go to Setup → Object Manager
2. Type Contact in the Quick Find box → click Contact
3. Click Fields & Relationships → click New
4. Select Data Type: Picklist → click Next
5. Enter Field Label: Experience Level
6. Enter values: Fresher, Mid-Level, Senior
7. Click Next, Next, and Save

Activity 2: Creating Master-Detail Field for Candidate Application Object

1. Go to Setup → Object Manager → type Candidate Application → click the object
2. Click Fields & Relationships → click New
3. Select Master-Detail as data type → click Next
4. Select the related object: Contact → click Next
5. Give Field Label as Candidate
6. Click Next, Next, Next, Save

Note: Create the remaining fields from the Fields table above for each object, choosing data types carefully.

Milestone 5: Validation Rules

Activity 1: Validation Rule on Candidate Application — Offer Amount

1. Go to Setup → Object Manager → Candidate Application
2. Click Validation Rules → New
3. Rule Name: Offer Amount Validation
4. Select Active
5. Error Condition Formula: Offer_Amount__c <= 0
6. Error Message: "Offer amount must be greater than zero."
7. Error Location: Top of Page
8. Click Save

Activity 2: Validation Rule on Job Opening — Vacancies

1. Go to Setup → Object Manager → Job Opening
2. Click Validation Rules → New
3. Rule Name: Job Vacancies Validation
4. Select Active
5. Error Condition Formula: Vacancies__c < 0
6. Error Message: "Vacancies cannot be negative."
7. Error Location: Top of Page
8. Click Save

Activity 3: Validation Rule on Candidate Application — AI Candidate Score

1. Go to Setup → Object Manager → Candidate Application
2. Click Validation Rules → New
3. Rule Name: AI Candidate Score Validation

4. Select Active
5. Error Condition Formula: $\text{OR}(\text{AI_Candidate_Score_c} < 0, \text{AI_Candidate_Score_c} > 100)$
6. Error Message: "AI Candidate score cannot exceed 100."
7. Error Location: Top of Page
8. Click Save

Milestone 6: Approval Process

This approval process ensures that candidate job offers with high salary amounts are reviewed and approved by a Hiring Manager, preventing unauthorized compensation decisions and enforcing company hiring policies.

Note: Before implementing the Approval Process, complete Profiles creation (Recruiter, Hiring Manager, Admin), Roles hierarchy setup, and Users creation with role assignment.

Activity 1: Create Classic Email Template for Approval Notification

Field	Value
Folder	Unfiled Public Email Templates
Email Template Name	High Salary Candidate Offer Approval Notification
Template Unique Name	High_Salary_Candidate_Offer_Approval_Notification
Encoding	UTF-8 (Default)
Subject	Candidate Offer Awaiting Salary Approval

Email Body:

Notifies the Hiring Manager that a high-salary offer needs approval, and lists Candidate Name, Job Opening, Experience Level, Proposed Offer Amount, AI Candidate Score, and Application Status.

Activity 2: Create the Approval Process

1. In Quick Find, type Approval Processes → click it under Process Automation
2. Click on the object name: Candidate Application
3. Click Create New Approval Process → Use Standard Setup Wizard

Step 1 – Basic Settings

- Name: High Salary Candidate Offer Approval
- Unique Name: auto-fills
- Click Next

Step 2 – Specify Entry Criteria

- Choose "Criteria are met"
- Field: Offer Amount, Operator: Greater than, Value: 1000000
- Field: Application Status, Operator: Equals, Value: Offer Submitted
- Click Next

Step 3 – Select Approver

- Choose Automatically assign to approver(s)
- Select Manager of Record Owner
- Record Editability: Administrators ONLY can edit records during approval

- Click Next

Step 4 – Email Template Selection

- Approval Assignment Email Template: High Salary Candidate Offer Approval Notification
- Click Next

Step 5 – Select Fields to Display on Approval Page

- Move to Selected Fields: Candidate Name, Job Opening, Offer Amount, AI Candidate Score, Application Status
- Arrange order using Up/Down
- Click Next

Step 6 – Specify Initial Submitters

- Search for Owner
- Add Record Owner to Selected Submitters (allows recruiters to submit offers)
- Click Save

Step 7 – Final Approval Actions

- Open the created approval process
- Click Add New → Field Update
- Name: Set Approval Status to Approved | Field to Update: Approval_Status__c | New Value: Approved
- Click Save

Step 8 – Final Rejection Actions

- Click Add New → Field Update
- Name: Set Approval Status to Rejected | Field to Update: Approval_Status__c | New Value: Rejected
- Click Save

Step 9 – Create an Approval Step

- Under Approval Steps, click New Approval Step
- Name/Unique Name: Step1, Step Number: 1
- Click Next
- Select "All Records Should enter this Step"

Step 10 – Activate the Approval Process

- Click View Approval Process Detail Page
- Click Activate (top-right)

Milestone 7: Email Templates

Activity 1: High Priority Candidate Application Notification

Objective: Notify the Recruiter when a candidate application is identified as high priority by AI and requires immediate attention.

1. Go to Setup → Quick Find → Email Templates → Classic Email Templates
2. Click New Template → select Text (Plain text) → Next
3. Template Name: High Priority Candidate Application Notification
4. Subject: High-Priority Candidate Application Assigned to You
5. Body includes Candidate Name, Job Opening, Experience Level, AI Candidate Score, and Application Date merge fields, with instructions to contact the candidate within 24 hours
6. Click Save

Activity 2: High Salary Candidate Offer Approval Email Template

Objective: Notify the Hiring Manager when a candidate offer with a high salary is submitted for approval.

1. Go to Setup → Email Templates → Classic Email Templates → New Template
2. Select Text (Plain text) → Next
3. Template Name: High Salary Candidate Offer Approval Notification
4. Subject: Candidate Offer Awaiting Salary Approval
5. Body includes Candidate Name, Job Opening, Proposed Offer Amount, AI Candidate Score, and Application Status merge fields
6. Click Save

Activity 3: Candidate Application Approval Outcome Notification

Objective: Notify the Recruiter (Application Owner) when a candidate offer is approved or rejected by the Hiring Manager.

1. Go to Setup → Email Templates → Classic Email Templates → New Template
2. Select Text (Plain text) → Next
3. Template Name: Candidate Application Approval Status Notification
4. Subject: Candidate Offer Approval Decision
5. Body includes Candidate Name, Job Opening, Approval Status, and Final Offer Amount merge fields
6. Click Save

Milestone 8: Email Alerts

Activity 1: High Priority Candidate Application Email Alert

Objective: Automatically notify the Recruiter when a candidate application is identified as high priority by AI.

1. In Quick Find, search Email Alerts → click Continue → New Email Alert
2. Description: High Priority Candidate Application Email Alert
3. Object: Candidate Application
4. Email Template: High Priority Candidate Application Notification
5. Recipient Type: User, Recipient: Record Owner
6. Click Save

Activity 2: High Salary Candidate Offer Approval Email Alert

Objective: Notify the Hiring Manager when a high salary candidate offer is submitted for approval.

1. In Quick Find, search Email Alerts → New Email Alert
2. Description: High Salary Candidate Offer Approval Email Alert
3. Object: Candidate Application
4. Email Template: High Salary Candidate Offer Approval Notification
5. Recipient Type: User, Recipient: Record Owner's Manager
6. Click Save

Note: Before creating this alert, create both Recruiter and Hiring Manager users, and set the Hiring Manager as the Recruiter's Manager — otherwise "Record Owner's Manager" will not appear as an option.

Activity 3: Candidate Application Approval Status Email Alert

Objective: Notify the Recruiter when a candidate offer is approved or rejected by the Hiring Manager.

1. In Quick Find, search Email Alerts → New Email Alert
2. Description: Candidate Application Approval Status Email Alert
3. Object: Candidate Application
4. Email Template: Candidate Application Approval Status Notification
5. Recipient Type: User, Recipient: Record Owner (or all internal users)
6. Click Save

Milestone 9: Declarative Automation (Flows)

The screenshot shows the Salesforce Setup page for Flows. The left sidebar contains a search bar with 'flows' entered and a list of categories: Process Automation, Identity, and Login Flows. The main content area displays a table of flow definitions. The table has columns for Flow Label, Process Type, and Package State. The flows listed are:

Flow Label	Process Type	Package State
Approvals Workflow: Ev...	Screen Flow	Managed-Installed
Approvals Workflow: Pr...	Screen Flow	Managed-Installed
Authentication Provider...	Identity User Registration ...	Managed-Installed
Basic Approval Request	Flow Orchestration for CMS	Managed-Installed
Cancel All Eligible Items...	Screen Flow	Managed-Installed
Cancel Item Flow	Screen Flow	Managed-Installed
Change Case Owner to ...	Screen Flow	Managed-Installed
Check Flow API Name	Autolaunched Flow	Managed-Installed
Check Service Plan Eligi...	Autolaunched Flow	Managed-Installed

Activity 1: Record-Triggered Flow – High Priority Candidate Application Notification

Objective: Automatically notify the Recruiter (Application Owner) when a candidate application is identified as high priority by AI. Trigger condition: $AI_Candidate_Score_c \geq 85$.

1. From Setup, search Flows → click New Flow
2. Category: Triggered, Type: Record-Triggered Flow
3. Object: Candidate_Application__c
4. Trigger: A record is created or updated

5. Entry Condition: AI_Candidate_Score__c, Greater than or Equal, 85
6. Select: Run every time a record is created and meets the condition
7. Optimize the flow for Actions and Related Records
8. Add Send Email Alert action → select High Priority Candidate Application Email Alert
9. Label: High Priority Candidate Application Notification
10. Map RecordId to the Record Id field
11. Save the Flow and Activate

Activity 2: Record-Triggered Flow – High Salary Offer Submission for Approval

Objective: Automatically submit a candidate offer for approval when a high salary amount is applied. Trigger condition: Offer_Amount__c > 1000000.

1. From Setup, search Flows → New Flow
2. Category: Triggered, Type: Record-Triggered Flow
3. Object: Candidate_Application__c
4. Trigger: A record is created or updated
5. Entry Condition: Offer_Amount__c, Greater than, 1000000
6. Select: Run every time a record is created and meets the condition
7. Optimize the flow for Actions and Related Records
8. Add Submit for Approval action → select High Salary Candidate Offer Approval
9. Label: Submit Candidate Offer for Approval
10. Map RecordId to the Record Id field
11. Save the Flow and Activate

Activity 3: Scheduled-Triggered Flow – Pending Candidate Application Follow-Up

Objective: Automatically identify candidate applications pending approval for more than 3 days and notify the Recruiter. Runs daily.

1. From Setup, search Flows → New Flow
2. Category: Triggered, Type: Scheduled-Triggered Flow
3. Set Start Date/Time (e.g. Today, 9:00 AM), Frequency: Daily
4. Object: Candidate_Application__c
5. Condition: Approval_Status__c Equals Pending
6. Additional Condition: LastModifiedDate less than TODAY() - 3
7. Optimize the flow for Actions and Related Records
8. Add Send Email Alert action → select Candidate Application Approval Status Email Alert
9. Label: Pending Application Reminder
10. Map RecordId to the Record Id field
11. Save the Flow and Activate

Activity 4: Screen Flow – Candidate Application Creation Wizard

Objective: Provide a guided, user-friendly screen-based process for recruiters to create candidate applications.

1. From Setup, search Flows → New Flow
2. Category: Screen Flow → click Create
3. Add Screen 1 "Candidate Details" with fields: Candidate, Job Opening, Application Date
4. Add Screen 2 "Offer Details" with fields: Offer Amount, AI Candidate Score
5. Add a Formula/Assignment element to calculate the Final Offer Amount
6. Add a Create Records element to create the Candidate_Application__c record
7. Add a Confirmation Screen: "Candidate Application Created Successfully"
8. Save the Flow as: Candidate Application Screen Flow
9. Activate the Flow

Milestone 10: Agentforce AI

Activity 1: Create Recruitment Assistant Agent

Objective: Create an AI-powered Recruitment Assistant using Agentforce Studio.

1. Go to Setup → search Agentforce Studio → click it
2. Open the Agents tab → click New Agent
3. Under Start with a template, select Agentforce Employee Agent
4. Agent Name: Recruitment Assistant Agent
5. Click Create
6. Save and Activate

Activity 2: Create Prompt Template – Candidate Application Summary

Objective: Generate an AI-based summary of a candidate application for recruiters and hiring managers.

1. From Setup, search Prompt Builder → click it
2. Click New Prompt Template
3. Prompt Type: Summary, Object: Candidate_Application__c

4. Prompt Name: Candidate Application Summary Prompt
5. Prompt Content: summarize Candidate Name, Job Opening, Experience Level, AI Candidate Score, Offer Amount, Application Status; output Candidate Summary, Strengths, Possible Risks, and Hiring Recommendation, using only Salesforce data
6. Click Save and Activate

Activity 3: Create Prompt Template – Hiring Risk Analysis

Objective: Help hiring managers understand whether a candidate application is risky or high value.

1. Go to Prompt Builder → New Prompt Template
2. Prompt Type: Flex, Object: Candidate_Application__c
3. Prompt Name: Candidate Hiring Risk Analysis Prompt
4. Prompt Content: analyze the candidate application and output Strengths, Weaknesses, Hiring Recommendation, and Risk Level (Low, Medium, High), based only on the Salesforce record
5. Click Save and Activate

Activity 4: Customize Recruitment Assistant Agent

Objective: Customize the default Employee Agent for recruitment.

1. Open the Recruitment Assistant Agent
2. Click General FAQ
3. Replace default reasoning instructions with recruitment-specific guidance covering Candidate Applications, Job Openings, AI Candidate Score, Application Status, and Offer Amount
4. Instruct the agent to ask for clarification if information is missing and never assume data that does not exist in Salesforce
5. Click Save

Activity 5: Test Recruitment Assistant Agent

Objective: Verify that the Recruitment Assistant Agent responds to recruitment-related questions.

1. Open the Recruitment Assistant Agent → click Preview
2. Ask: "What can you do?"
3. Ask: "How can you help recruiters?"
4. Ask: "How do I evaluate a candidate application?"
5. Verify that the agent responds correctly, asking follow-up questions when additional information is required

Note: In a standard Salesforce Developer Edition, the agent may not automatically retrieve data from custom objects such as Candidate Application or Job Opening without additional Agentforce configuration or Data Cloud capabilities. If the agent asks for more information instead of summarizing a record, this is expected behavior unless additional grounding or custom actions have been configured.

Phase 3: UI/UX Development and Customization

Milestone 11: The Lightning App

Activity 1: Create a Lightning App for AI-Powered Recruitment & Candidate Management System

1. From Setup, enter App Manager in Quick Find → select App Manager
2. Click New Lightning App
3. App Name: AI-Powered Recruitment & Candidate Management System; upload a related image → click Next

4. Under App Options, keep default selections → Next
5. Under Utility Items, keep default → Next
6. From Available Items, select Candidate Applications, Candidates (Contact), Job_Opening__c, Accounts, Reports, Dashboards → move to Selected Items → Next
7. From Available Profiles, select System Administrator, Recruiter, and Hiring Manager → move to Selected Profiles
8. Click Save & Finish

Milestone 12: Editing of Page Layouts

Activity 1: Edit Page Layout — Candidate Application

1. Go to Setup → Object Manager → Candidate_Application__c → Page Layouts
2. Click the Candidate Application Layout
3. Arrange fields: Candidate, Job Opening, Application Date, AI Candidate Score, Offer Amount, Application Status, Approval Status
4. Click Save

Activity 2: Edit Page Layout — Job Opening

1. Go to Setup → Object Manager → Job Opening → Page Layouts
2. Click the Job Opening Layout
3. Arrange fields: Job Title, Department, Salary Range, Vacancies, Job Status
4. Click Save

The screenshot shows the Salesforce Setup interface in Developer Edition. The left sidebar contains a navigation menu with options: Details, Fields & Relationships, Page Layouts (selected), Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, and Restriction Rules. The main content area is titled 'Job Opening' and shows 'Page Layouts' with 1 item, sorted by Page Layout Name. A table lists the page layout 'Job Opening Layout', created by Priyanka Tokala on 27/06/2026 at 9:53 pm, and modified by Priyanka Tokala on 27/06/2026 at 10:54 pm. The browser's address bar shows the URL: creative-impala-32mwfq-dev-ed.trailblaze.my.salesforce-setup.com/lightning/setup/ObjectManager/01lg7000002J2ub/PageLayouts/view. The Windows taskbar at the bottom shows the date as 12-07-2026 and time as 20:58.

Activity 3: Edit Page Layout — Contact

1. Go to Setup → Object Manager → Contact → Page Layouts
2. Click the Contact Layout
3. Arrange fields: Name, Candidate ID, Email, Phone, Experience Level
4. Click Save

Milestone 13: Dynamic Forms

Activity 1: Create a Dynamic Form on Candidate Application Object

1. Go to Setup → App Launcher → open AI-Powered Recruitment & Candidate Management System app
2. Click the Candidate Application tab → open (or create) a record
3. Click the record's Gear icon (top-right) → select Edit Page
4. Click the Details section → click Upgrade Now to enable Dynamic Forms
5. Select Candidate Application Page Layout → click Finish
6. Click Save → click Activate
7. Set as Org Default, select Desktop and Phone → Next → Save
8. Repeat the same steps for Job Opening and Contact

Milestone 14: Users

A user is anyone who logs in to Salesforce. Users represent recruiters, hiring managers, and administrators who need access to candidate applications, job openings, and approval processes. Complete Profiles and Roles milestones before creating users.

Activity 1: Create Recruiter User

1. Go to Setup → type Users in Quick Find → select Users → click New User
2. First Name: Recruiter, Last Name: User
3. Alias: give an alias (e.g. recru)
4. Email: use a personal email
5. Username: format text@text.text, must be unique
6. Nickname: give a nickname
7. Role: Recruiter, User License: Salesforce, Profile: Recruiter Profile
8. Click Save

Activity 2: Create Hiring Manager User

1. Repeat the same steps using Role: Hiring Manager, User License: Salesforce, Profile: Hiring Manager Profile

Activity 3: Assign Manager to Recruiter User

1. Go to Setup → search Users
2. Open the Recruiter User → click Edit
3. In the Manager field, select the Hiring Manager User
4. Click Save

Phase 4: Data Migration, Testing and Security

Milestone 15: Duplicate and Matching Rules

This milestone ensures data integrity in the Recruitment System by preventing duplicate Candidate (Contact) records and duplicate Candidate Application records. Accurate and clean hiring data is critical for reliable AI candidate scoring, correct risk analysis, meaningful Agentforce recommendations, and accurate offer approvals and reporting.

The screenshot shows the Salesforce Setup interface in a web browser. The browser tabs include SkillWallet, Matching Rules | Salesforce, Flows | Salesforce, and Download file | iLovePDF. The address bar shows a URL from trailblaze.my.salesforce-setup.com. The Salesforce interface has a top navigation bar with 'Developer Edition' and a search bar. The left sidebar shows the 'Setup' menu with 'Home' and 'Object Manager' options. The 'Setup' menu is expanded, showing 'Data' and 'Duplicate Management' sub-menus. The 'Matching Rules' option is highlighted. The main content area is titled 'Matching Rules' and shows a 'New Matching Rule' form. The form has a 'Step 1: Select object' section with a dropdown menu for 'Object' set to 'None--'. There are 'Next' and 'Cancel' buttons at the bottom right of the form. The bottom of the screenshot shows a Windows taskbar with various application icons and a system clock showing 21:03 on 12-07-2026.

Activity 1: Create a Custom Matching Rule for Candidate (Contact)

Objective: Ensure each candidate is uniquely identified using Email and Phone.

1. Go to Setup → search for Matching Rules
2. Click New Rule
3. Select Object: Contact → click Next
4. Rule Name: Unique Candidate – Email & Phone
5. Matching Criteria — Field: Email, Method: Exact
6. Matching Criteria — Field: Phone, Method: Exact
7. Check Match Blank Fields

8. Click Next
9. Click Save & Activate

Activity 2: Create a Duplicate Rule for Candidate (Contact)

1. Go to Setup → search for Duplicate Rules
2. Click New Rule
3. Select Object: Contact
4. Rule Name: Unique Candidate Email and Phone
5. Set Action on Create and Action on Edit: Allow and Report
6. Alert Text: "Candidate Email and Phone Number must be unique."
7. In Matching Rules section, click Add Rule
8. Select the matching rule: Unique Candidate – Email & Phone
9. Click Save & Activate

Milestone 16: Profiles

A profile is a group of settings and permissions that define what a user can do in Salesforce. Profiles control object permissions, field permissions, user permissions, tab settings, app settings, Apex class access, Visualforce page access, page layouts, record types, and login hours/IP ranges.

Standard Profiles

- Contract Manager
- Read Only
- Marketing User

- Solutions Manager
- Standard User
- System Administrator

Standard profiles cannot be deleted and include a default set of permissions for all standard objects.

Custom Profiles

Custom profiles are defined by the org admin and can be deleted if no users are assigned to them.

Activity 1: Recruiter Profile Creation

Objective: Provide recruiters with controlled access to candidate applications, job openings, AI hiring insights, and daily recruitment activities.

1. Go to Setup → type Profiles in Quick Find → click Profiles
2. Clone the Standard User profile → name it Recruiter Profile → Save
3. Click Edit on the profile
4. Select the AI-Powered Recruitment & Candidate Management System as the default Custom App
5. Under Custom Object Permissions, grant Read/Create/Edit for Contact, Candidate_Application__c, and Job_Opening__c
6. Grant Read-Only access for Reports and Dashboards
7. Set Session Timeout to 2 hours of inactivity
8. Grant Read access to AI Candidate Score field (no approval/override permissions)
9. Configure Password Policy: passwords expire in 90 days, minimum length 8
10. Click Save

The screenshot shows the Salesforce Setup interface for a custom profile named 'Recruiter Profile'. The browser address bar indicates the URL: `creative-impala-32mwfq-dev-ed.trailblaze.my.salesforce-setup.com/lightning/setup/EnhancedProfiles/page?address=%2F00eg7000003efKT`. The interface includes a search bar, navigation tabs (Setup, Home, Object Manager), and a sidebar with 'profiles' and 'Users' sections. The main content area shows the 'Recruiter Profile' details, including a list of permissions (Login, Apex, Visualforce, External Data Source, Named Credential, Custom Metadata, Custom Setting Definitions, Flow, Service Presence Status, Custom Permissions) and a table of page layouts. The 'Recruiter Profile' is a custom profile with a 'Salesforce' user license. The page layouts table shows a 'Global' layout assigned to 'Global Layout' and an 'Individual' layout assigned to 'Individual Layout'.

Profile Detail

Name	Recruiter Profile
User License	Salesforce
Description	
Created By	Priyanka Tokala, 12/07/2026, 9:06 pm
Modified By	Priyanka Tokala, 12/07/2026, 9:06 pm

Page Layouts

Standard Object Layouts	Global	Individual
	Global Layout [View Assignment]	Individual Layout [View Assignment]

Activity 2: Hiring Manager Profile Creation

1. Go to Setup → Profiles → clone the Standard User profile → name it Hiring Manager Profile → Save
2. Click Edit on the profile
3. Select the AI-Powered Recruitment & Candidate Management System as the default Custom App
4. Grant Read/Create/Edit/Delete access for Contact, Candidate_Application__c, Job_Opening__c, Reports, and Dashboards
5. Grant approval permissions: can approve/reject high salary offers, can override AI recommendations
6. Grant full AI & Agentforce visibility: AI candidate score, risk analysis, hiring recommendations
7. Set Session Timeout to 2 hours
8. Click Save

Milestone 17: Roles & Role Hierarchy

A role in Salesforce defines a user's record-level data visibility and controls who can see whose records in the organization hierarchy. In this system, roles ensure recruiters see only their assigned candidates while hiring managers can see all team recruitment records.

Activity 1: Creation of Hiring Manager Role

1. Go to Quick Find → search Roles → click Set Up Roles
2. Click Expand All, then Add Role under CEO
3. Label: Hiring Manager (Role Name auto-populates)
4. Click Save

Activity 2: Creation of Recruiter Role

1. Go to Quick Find → search Roles → click Set Up Roles
2. Click the + (Add Role) under Hiring Manager
3. Label: Recruiter (Role Name auto-populates)
4. Click Save
